Macular
Degeneration
Foundation

Alliance For Eye
And Vision Research
AEVR

**1 IN 3 AMERICANS
OVER 75 ARE AT
RISK FOR MACULAR
DEGENERATION**

Age-related macular degeneration quietly robs millions of Americans of their sight, including constituents in every congressional district. This critical briefing will highlight the latest advances in AMD research and the transformative progress made possible through sustained investment by the National Eye Institute, the federal agency solely dedicated to eye and vision science.

Protecting the National Eye Institute and prioritizing robust vision research funding are more important than ever. NEI-supported research fuels the discovery pipeline that drives innovation, preserves independence, and delivers sight-saving treatments. Join us to learn how continued federal investment can deliver real results for Americans at risk of losing their vision, and their independence.
